WINTERIZING

SHARPENING

MOWING

EDGING

BAGGING

SPRING

Sharpen Mower Blades

New blades typically are not sharp, and still need sharpened prior to use.

Mow High & Frequent

Set mower height to 3 ½ - 4", no shorter. Mow 2x weekly avoiding removing more than 1/3 of the grass blade.

Don't Bag

Avoid bagging the clippings unless chunks of grass are being left behind.

Edging

Limit edging to when it's absolutely necessary.

Watering

Typically not needed before May, unless seeding in the Spring. Once temperatures warm up, water 2x weekly for 30-45 minutes, preferably in the morning.

SUMMER

Mow High

Cut grass at 3 ½ - 4" once weekly, no shorter. Avoid removing more than 1/3 of the grass blade.

Don't Bag

Avoid bagging the clippings.

Water

Water 2x weekly for 30-45 minutes preferably in the morning. Longer intervals near edges of walks and drive.

Weed Eating/Trimming

Avoid cutting edges short, keeping all grasses between 3 ½ - 4".

FALL

Sharpen Mower Blades

Mower blades need to be sharpened often.

Mow High & Frequently

Cut grass at 3 ½ - 4" once weekly, no shorter. Avoid removing more than 1/3 of the grass blade.

Don't Bag

Mulch the clippings and leaves instead of bagging.

Aerate/Seeding

Helps alleviate soil compaction allowing more air, water, and nutrients to get to the roots. This also is a great time to seed.

Watering

Water 2x weekly for 30-45 minutes, preferably in the morning.

WINTER

Mow High

Cut grass at 3 ½ - 4", until seasonal growing ends.

Don't Bag

Mulch the clippings and leaves instead of bagging.

Winterizing

A high nitrogen fertilizer helps build strong roots, hardens the plant to prevent winter damage, and helps the lawn green up quicker next year.

GET THE MOST OUT OF YOUR LAWN SERVICE

Communication Is Key— If you take our Full Lawn Care Program and you have weeds that aren't starting to wilt within 10-14 days after your treatment, give the office a call. We offer free service calls between your normal scheduled applications.

We're Here For You— If you have questions or concerns about your lawn throughout the season; give us a call! **(317)251-6800**
